- ITIL V3 2011 Foundation

EXECUTIVE PROFILE

Product executive with 19+ years leading enterprise product strategy, platform innovation, and cross-functional delivery across global banking, FinTech, and technology organizations. Known for building and scaling product functions from the ground up, from shaping vision and roadmap through to shipping compliant, high-impact platforms across 20+ countries.

Deep domain expertise across Financial Crime Compliance, AML/FCC platforms, AI/Data products, and DevSecOps. Recognised industry innovator, named Rising FinTech Banking Star by FinTech Futures in 2020 and HSBC's first-ever global Architect of the Year in 2019. Comfortable operating at C-suite level with a track record of securing multi-million-dollar investment approvals, building high-performing product teams, and delivering measurable business outcomes at scale.

KEY SKILLS

- **Strategic Planning & Execution:** Define and drive strategic roadmaps for the business with full responsibility for annual and long-term growth plans. Experience leading complex, large-scale business transformations and advising companies on reinventing themselves through innovation and effective use of technology.
- **Product Management:** Proven track record of building new offerings and solutions to drive growth. Expertise in the entire life cycle of product development from ideation, conceptualization, and commercialization.
- **User-centered Design:** Experience in conducting user research, user testing, and incorporating user feedback into product development.
- **Projects & Initiatives:** Provide thought leadership and dependable execution on diverse projects. Proven track record of building new offerings and solutions to drive growth. A passionate innovator with expertise across the entire life cycle of product/service development, from building high-performance teams, ideation, conceptualization, and commercialization.
- **Transformations:** Recommend a change management framework for continuous improvement, engagement, a change mindset, and behavior; implementation management processes and tools to ensure focus on execution & fast resolution of roadblocks.
- **Architecture:** Expertise in designing and implementing cloud-based solutions utilizing orchestration technologies such as Google Cloud and APIs. Experience leading compliance efforts and building best-in-class transformation offerings that strengthen the value proposition. Partner with solution teams to customize solutions as per clients' requirements and costs for each client in the portfolio, specializing in the Financial Crime domain.
- **People Development:** Mentoring and nurturing strong business-minded talent through planned initiatives, knowledge transfers, and leading them from the front to deliver business excellence, client experience, and organizational growth.

NOTABLE ACHIEVEMENTS

- Named Highly Commendable Rising FinTech Banking Star by FinTech Futures (2020), one of the most competitive innovation recognitions in the industry.
- Awarded HSBC's inaugural global Architect of the Year title (2019), selected from a worldwide pool of technology leaders across the bank.
- Instigated and led HSBC's first-ever Global Virtual Hackathon, building an internal innovation pipeline that directly influenced technology investment decisions at enterprise level.
- Recipient of the HSBC Annual Shine Award (2020), Technologist of the Quarter, Pioneer of the Quarter, and Innovation Star of the Quarter, reflecting sustained performance across product, technology, and people leadership.
- Secured US\$1.4M in technology investment approvals through executive-level business cases spanning AI, compliance platforms, and platform modernisation initiatives.

PROFESSIONAL NARRATIVE

Lloyds Technology Centre | Data Product Owner | Oct 2024 -Present

Driving product strategy and execution for Lloyds' enterprise Customer Data Platform, enabling data-driven decisioning, customer intelligence, and AI-ready data infrastructure across one of the UK's largest retail banking groups.

- Defining and owning the product vision and 12-month roadmap for the Customer Data Platform, aligning data capabilities with enterprise AI, personalisation, and regulatory data governance priorities.
- Leading cross-functional squads across Data Engineering, Architecture, Analytics, and Compliance to build scalable, governed data pipelines supporting 20M+ customer records.
- Partnering with C-suite and senior business stakeholders to translate strategic data ambitions into prioritised, deliverable product increments with clear business value.

- Mar 2008 – Aug 2008: Wipro -CapitalOne – Webservers

POSITIONS OF RESPONSIBILITY

- Product Owner Community Lead @Lloyds
- Global Innovation Community Lead@HSBC
- Inclusion & Diversity Balance Lead @HSBC
- Talent Market Place Influencers
- Enterprise Engineers India Chapter Lead
- Graduates' mentorship
- Culture of Innovation Lead- HSBC India

- Establishing product operating model standards including OKR frameworks, discovery cadences, and stakeholder review rhythms to strengthen product delivery maturity within the GCC.
- Championing the Product Owner Community of Practice at Lloyds Technology Centre India, building product management capability and raising standards across the GCC engineering function.

HSBC | Senior Product Owner | Sept 2023 – Oct 2024

Led product ownership for HSBC's GCP-based Strategic Rules Engine platform, driving Financial Crime detection capabilities across global markets while aligning product strategy with regulatory, operational, and business objectives.

- Spearheaded delivery of 30+ AML/financial crime detection rules across 5 global markets, accelerating identification of emerging crime patterns and strengthening compliance monitoring capabilities.
- Managed product roadmap and backlog prioritization across 6 cross-functional teams supporting enterprise platforms deployed in 20+ countries, improving delivery visibility and OKR alignment.
- Led cross-functional teams spanning Software Engineering, Data Analytics, Architecture, and Operations to deliver multiple regulatory-mandated initiatives across 9 months, achieving a 100% on-time delivery record.
- Drove a 50% improvement in stakeholder satisfaction scores by streamlining requirements gathering, increasing roadmap transparency, and deepening engagement across Compliance, Technology, and Business leadership.
- Optimized delivery workflows through value stream mapping, reducing feature cycle time from 180 to 90 days while maintaining GCP platform quality, governance, and compliance standards.
- Built and presented data-driven business cases securing US\$1.4M in technology investment approvals from senior Financial Crime leadership, enabling platform modernization and strategic prioritization.
- Mentored cross-functional team members and established agile delivery practices across globally distributed functions, driving continuous improvement and high-performance collaboration.

CloudBees | Product Architect and Lead Product Manager | June 2022 – May 2023

Led product architecture and end-to-end product management for CloudBees' enterprise Security and Compliance platform, translating complex DevSecOps requirements into a scalable, policy-driven control plane that unified security tooling across CI/CD pipelines for enterprise customers.

- Drove technology evaluation and adoption of 8+ emerging DevSecOps tools and frameworks, identifying integration opportunities with scanners like Snyk, SonarQube, and Black Duck to reduce architectural debt by approximately 30%.
- Architected and maintained comprehensive technical documentation, system diagrams, and compliance control records across 3 core platform domains, reducing new engineer onboarding time by 40%.
- Provided hands-on technical guidance to 4 development squads, ensuring architectural compliance across all feature builds and cutting post-release rework by 25%.
- Partnered with 6 enterprise architects to align the compliance platform architecture with organization-wide standards, contributing to a unified security governance model adopted across 3 business units.
- Conducted structured code reviews across bi-weekly sprint cycles, maintaining policy enforcement standards and reducing technical debt accumulation by an estimated 20% over the engagement.
- Led customer discovery and market research by synthesizing feedback from 50+ enterprise customers across financial services, government, and technology sectors, directly informing 3 major roadmap pivots around audit evidence automation and regulatory framework coverage.
- Owned and maintained a 12-month product roadmap and prioritized backlog of 200+ items, balancing immediate compliance mandates (SOC 2, PCI, ISO 27001) with long-term platform scalability and Open Policy Agent extensibility goals.
- Managed full product development lifecycle across design, engineering, and QA functions for 15+ feature releases, achieving an average 95% on-time delivery rate within 12 months.

HSBC | Head, Practices and Innovation & Associate Lead Architect- April 2017 – May 2022

IT Project Management Consultant | APR 2015 – MAR 2017

Led innovation strategy, architecture governance, and technology practices across HSBC's Enterprise Technology India function over a 7-year tenure, spanning Financial Crime Risk, FinTech partnerships, compliance platform delivery, and organization-wide capability building.

- Held concurrent leadership mandates across Portfolio Architecture for Intelligent-Led Financial Crime Risk, Compliance IT Innovation, Architecture Academy, Global Hackathon delivery, and Culture of Innovation, driving enterprise-wide impact across HSBC Technologies India.
- Architected and delivered 10+ Financial Crime Risk Management platforms and applications, applying cloud-native design, microservices patterns, and API-led integration to strengthen AML compliance and detection capabilities across global markets.
- Identified and evaluated 20+ global FinTech partners annually, leading solution architecture collaborations and converting research findings into technology investment recommendations adopted at senior leadership level.
- Defined enterprise-wide technology standards, architecture patterns, and SAFe/Agile operating frameworks across Enterprise Technology IT India, improving delivery consistency across 5+ product

and engineering teams.

- Designed and executed the Architecture Academy training curriculum, training 60+ architects across HSBC India and building a structured Architect Community that standardized best practices across the enterprise.
- Instigated and led HSBC's first-ever Global Virtual Hackathon, building an internal innovation pipeline that generated evaluated business cases and directly shaped technology investment priorities.
