# Sunil Ravva

VP Product & Innovation Leader | Enterprise Platform Architecture  
& Data Strategy | Building Scalable Financial Products | Banking &  
FinTech Innovator  
Greater Hyderabad Area

## Summary

I architect the future of financial innovation through product leadership that bridges vision and execution. With 19+ years transforming complex technology into market-leading solutions across banking, fintech, and enterprise platforms, I bring a unique blend of product strategy, architecture thinking, and execution excellence. Currently leading data product initiatives at Lloyds Technology Centre India, serving millions of customers across the UK banking ecosystem. My Expertise: Product Leadership & Strategy • VP-track product ownership of enterprise platforms • Portfolio leadership across 15+ product initiatives • Cross-functional alignment with C-suite stakeholders • Market-driven roadmap strategy & execution • Enterprise Architecture & Scaling • Cloud-native platform architecture (GCP, microservices) • Solutions serving 10M+ end customers • Presence across UK, India, and global financial markets • Technical foundation for 5x+ organizational growth Financial Innovation & Transformation • Digital transformation leadership in banking & fintech • Customer Data Platform (CDP) strategy & deployment • API-first ecosystem thinking & partner enablement • Proven success with Fortune 500 & high-growth fintech What sets me apart: I don't just manage products—I architect sustainable systems. My approach blends deep technical acumen with business strategy, ensuring every decision drives measurable outcomes. From conceptualizing AI-driven features to orchestrating enterprise transformations, I thrive at the intersection of innovation, ownership, and impact. Recognition: • HSBC 1st Architect of the Year (2019) • Banking Tech Awards – Rising Fintech Star (2020) • Technologist of the Quarter – HSBC (2021) • Trained 70+ architects across India-UK operations • Built and led innovation communities driving 50+ strategic initiatives Thought Leadership: Published weekly insights on product strategy, platform architecture, and financial innovation through "Build Better. Think Broader" newsletter (1000+ subscribers). Speaking voice on

enterprise product challenges, data architecture, and innovation culture. Let's connect if you're passionate about building scalable, human-centered products that transform how financial services work.

---

## Experience

### Lloyds Technology Centre India

#### Data Product Owner

October 2024 - Present (1 year 7 months)

Hyderabad

Leading data product ownership for core platforms that power customer, risk, and decisioning journeys across the UK banking ecosystem.

- Own vision, strategy, and roadmap for data products serving multi-million customer use cases across retail and group functions.
- Translate business goals into platform capabilities, balancing regulatory needs, data quality, and speed-to-market.
- Partner with architecture, engineering, and risk teams to build AI-ready, cloud-native data products with clear contracts, SLAs, and governance.
- Define and track outcome-oriented metrics (adoption, reuse, decision quality, and cycle time) to guide investment and prioritisation.
- Champion product ownership culture in data teams through storytelling, internal forums, and the "Build Better. Think Broader." lens.

### HSBC Data Processing Pvt. Ltd

#### Senior Product Owner - VP

September 2023 - October 2024 (1 year 2 months)

Hyderabad

- Defined and communicated product vision, ensuring it was aligned with company objectives and customer needs. Created compelling product narratives to guide the team and stakeholders.
- Engaged with senior stakeholders to gather requirements, prioritize features, and ensure alignment with strategic business goals.
- Developed and maintained a comprehensive product roadmap, prioritizing features and initiatives based on business value and market trends.
- Led Agile ceremonies, collaborating with development teams to define sprint goals, prioritize backlog

items, and continuously improve team performance.

- Fostered a culture of continuous improvement, driving innovation and optimizing product performance and customer satisfaction.
- Managed live market incidents, investigated issues, developed contingency plans, and created development stories to address root causes and prevent recurrence, while keeping senior stakeholders informed on risks and issues through regular updates to ensure product stability, user satisfaction, and proactive management.

## CloudBees

### Product Architect & Lead Product Manager

June 2022 - May 2023 (1 year)

India

- Identifying and assessing new technologies and trends that could be leveraged to improve the product
- Developing and maintaining technical documentation and diagrams to support the product architecture
- Providing technical guidance to development teams to ensure that the product is built according to the established architecture
- Collaborating with other architects to ensure that the product architecture aligns with the overall enterprise architecture
- Participating in code reviews to ensure that the product is being built according to the established architecture
- Conducting market research and gathering customer feedback to inform product decisions
- Developing and maintaining product roadmaps and backlogs
- Prioritizing and managing the development of new features and enhancements
- Coordinating with design, development, and QA teams to ensure that the product is being built according to the established roadmap

## HSBC

7 years 3 months

### Associate Lead Architect

April 2020 - July 2022 (2 years 4 months)

Hyderabad, Telangana

## Head- Practices & Innovation - Group Functions IT, India

May 2020 - June 2022 (2 years 2 months)

Hyderabad, Telangana

- Scope of responsibility is broad, which includes identifying the best FinTechs globally, partnering with them for solution architecture, research new and upcoming technologies, and transform processes in the bank via idea management and innovation governance.
- Strategizing, executing improvements, cost optimizations to the existing IT infrastructure by conducting extensive research and implementing progressive new technologies.
- Key role in establishing business and IT innovation alliance through innovation forums.
- Work in close collaboration with internal and external parties for driving initiatives related to Fintech adoption, effective digitization, and partnership.
- Skillfully identify trends in innovation and complement research findings in the bank by monitoring research and development of other organizations.
- Instrumental in driving skill assessment and improvement by encouraging up-skilling of teams with new and existing technologies.

## Portfolio Architect - Financial Crime Risk IT

September 2017 - April 2020 (2 years 8 months)

Hyderabad Area, India

Employing robust experience, I administer a range of activities related to portfolio architecture while managing numerous other tasks that include Mentor for Enterprise Engineers Program (EEP), Train the Trainer, Hackathon Lead etc. Making notable contributions in the continued development of application system, I support Financial Crime Threat Mitigation, ensuring the design/solution is aligned with architecture standards, and the IT business strategy/meet business objectives.

Exercising a diligent approach, I have instigated and conducted extensive factual and expert research, implemented new progressive technologies which have enhanced existing IT infrastructure with strategic improvements and cost optimizations. The scope of my responsibilities involves mentorship, use-cases for EEP batches, Graduate mentorship, etc.

My duties comprise performing architecture on a bunch of applications which run for financial crime risk in the bank. I also contribute in the development of a governance framework to manage scope and justification for decisions and actions throughout lifecycle.

My success includes building Architecture Community by providing training to entry-level architects; implementing API/Micro service Architecture and partaking in various decision-making forums. I proved contributory as Active member in Architecture and Technology Academy and volunteering initiatives which make HSBC a better place to work and Manifesto 1.0 come into a reality.

My sincerity and hard work have enabled me to bag various awards, including 'Feather in My Cap' (thrice), 'Star Performer for the Quarter', 'Best Star', Pioneer of the Quarter 2019, Pioneer-Best Knowledge Management Contributor, Competency Contributor etc to name a few. I have earned recognition as the first person in HSBC as Train the trainer and successfully delivered Architecture training to 72+ members across India and UK for up skilling people into architecture along with 1st Architect of the year Award in HSBC

#### Solution Architect- Financial Crime Risk & Threat Mitigation February 2017 - August 2017 (7 months)
